

One Pager – Marketing Analytics & Growth Intelligence Framework for Peomiz

Project Title

Marketing Analytics & Growth Intelligence Framework for Peomiz

Objective

To build a data-driven reporting and analytics framework that helps Peomiz monitor customer acquisition, user behavior, marketing performance, and booking conversions to support informed business decisions and growth.

Problem Statement

Currently, there is no centralized framework to track the complete customer journey, identify booking drop-offs, evaluate SEO performance, or measure the effectiveness of marketing initiatives. This limits the ability to make timely, data-backed decisions.

Proposed Solution

Develop an analytics framework that combines website and application insights to monitor customer behavior and generate actionable recommendations.

Scope of Work

- Define and track key business KPIs.
- Analyze customer booking funnels.
- Monitor SEO performance and traffic sources.
- Evaluate digital marketing and social media effectiveness.
- Prepare weekly and monthly performance reports.
- Identify areas affecting customer conversion and retention.

Expected Deliverables

- KPI Dashboard Framework.
- Funnel Analysis Reports.

- SEO Performance Reports.
- Marketing Performance Reports.
- Monthly Growth Summary with recommendations.

Expected Outcomes

- Improved booking conversion rates.
- Better visibility into customer behavior.
- Identification of drop-off points.
- Data-driven decision making.
- Enhanced marketing effectiveness.

Success Metrics

- Increase in booking conversion rate.
- Reduction in funnel abandonment.
- Growth in organic traffic.
- Increase in lead generation.
- Improved reporting accuracy and speed.
