Product Title

Marketing Analytics & Growth Intelligence Framework for Peomiz

Prepared By

Jaipreet Singh

Objective

To establish a structured analytics and reporting framework that enables Peomiz to measure performance, identify customer pain points, optimize marketing efforts, and improve booking conversions.

1. Background

Peomiz offers a variety of home and professional services through its digital platform. As the business scales, there is a need to track customer journeys, understand user behavior, and evaluate the effectiveness of marketing initiatives.

The current focus should be on transforming operational and customer data into actionable insights.

2. Problem Statement

The platform currently lacks a centralized mechanism to:

- Monitor customer acquisition and conversion.
- Identify booking funnel drop-offs.
- Measure SEO and digital marketing performance.
- Evaluate campaign effectiveness.

- Generate regular business intelligence reports.

Without these capabilities, decision-making becomes reactive rather than proactive.

3. Goals

Primary Goals

- Improve booking conversion rates.
- Track and optimize customer journeys.
- Increase visibility into marketing performance.
- Support leadership with timely insights.

Secondary Goals

- Improve customer retention.
 - Identify high-performing service categories.
 - Enable future predictive analytics initiatives.
-

4. Functional Requirements

4.1 KPI Dashboard

The framework should track:

Traffic Metrics

- Total Users
- Sessions
- New vs Returning Users
- Traffic Sources

Booking Metrics

- Total Bookings
- Booking Conversion Rate
- Completed Bookings

- Cancelled Bookings

Marketing Metrics

- Leads Generated
- Organic Traffic
- Social Media Engagement
- Campaign Performance

Customer Metrics

- Returning Customers
 - Repeat Booking Rate
 - Customer Retention Rate
-

4.2 Funnel Analytics

Track customer movement through the booking journey:

Homepage Visit

OTP Verified

↓

Service Selection

↓

Add to Cart

↓

Address Selection

↓

Pincode Validation

↓

Checkout Initiated

↓

Payment Completed

↓

Booking Confirmed

The system should identify drop-off percentages at each stage.

4.3 SEO Reporting

Monitor:

- Organic Traffic Trends
 - Top Landing Pages
 - Keyword Performance
 - Click Through Rates
 - Bounce Rates
 - Indexed Pages
-

4.4 Marketing Reporting

Track:

- Campaign Performance
 - Channel-wise Lead Generation
 - Customer Acquisition Sources
 - Social Media Performance
 - Conversion by Channel
-

4.5 Monthly Growth Summary

Provide:

- Key Performance Highlights.
 - Areas of Concern.
 - Improvement Opportunities.
 - Actionable Recommendations.
-

5. Non-Functional Requirements

- Reports should be simple and easy to understand.
- Data should be updated regularly.
- Dashboards should support management-level decision making.
- Insights should focus on business impact.

6. Success Metrics

The project will be considered successful if it achieves:

- Improved booking conversion rates.
 - Reduced customer drop-offs.
 - Faster access to business insights.
 - Better understanding of customer behavior.
 - Increased effectiveness of marketing initiatives.
-

7. Future Enhancements

Potential future improvements include:

- Predictive booking analytics.
 - Customer segmentation.
 - Recommendation engines.
 - AI-assisted reporting.
 - Automated anomaly detection.
-

Conclusion

The proposed Marketing Analytics & Growth Intelligence Framework will enable Peomiz to transition from intuition-based decisions to data-driven growth strategies. By monitoring customer journeys and marketing effectiveness, the company can improve conversions, optimize campaigns, and enhance customer experiences while supporting sustainable business growth.
